

# MAGNUM<sup>®</sup>

## MAGNUM GEAR OIL

**MAGNUM Gear Oils** are manufactured from high quality base stocks. These oils are fortified with defoamers and rust and oxidation inhibitors for lasting trouble-free and sludge-free performance. **MAGNUM Gear Oils** meet API GL-1 as well as AGMA R&O service classifications where low to moderate loading at moderate to high temperatures are encountered.

### Recommended For:

Typical applications range from lightly loaded automotive spiral-bevel and worm gears and transmissions, large slow speed industrial cylinders, industrial parallel shaft gears, condensing and high super heat steam cylinders and crusher bearings.

### Typical Properties:

Grade:	90	140
Product Code:	510	511
Viscosity, @ 100F SUS	600-1400	1600-3100
Color, ASTM-D1500	<5.0	<5.0
Flash, F	350 min.	375 min.
Viscosity, cSt @ 100C	13.5-18.5	24.0-32.5
