CAM2® Rock Drill Oil

CAM2® ROCK DRILL OILS are specifically compounded extreme-pressure oils developed for lubrication of pneumatic percussion tools. CAM2® Rock Drill Oils provide outstanding stability, adhesiveness, and exceptional load-carrying ability. They contain extreme-pressure additives to protect drill parts from wear. They provide excellent rust prevention and are noncorrosive to both ferrous and nonferrous metals.

CAM2® Premium Saw Blade & Guide Oil

CAM2® PREMIUM SAW BLADE AND GUIDE OILS are blended with premium paraffinic base stocks and specially selected additives to reduce friction between the saw and guide in thin Kerf Saws. They promote longer saw guide and saw blade life when operating in severe service. They are designed to reduce rust and corrosion and to promote cooler operation. They exhibit superior film strength to create boundary lubrication and provide excellent extreme pressure properties. The additive emulsion is optimized to allow the correct mixing of water and oil. They are tacky to enable the oils to cling to blade and guide components.

CAM2® PROMAX™ Premium AW Hydraulic Fluid

CAM2® PROMAX™ PREMIUM AW HYDRAULIC FLUIDS are high viscosity index, anti-wear hydraulic oils blended from superior quality base stocks. CAM2® PROMAX™ Premium AW 32 and AW 46 Hydraulic Oils provide up to 5000 hours of protection. CAM2® PROMAX™ Premium AWs are available in 4 viscosity grades to comply with most industrial applications. All grades are formulated according to the ISO viscosity grade classification and meet the testing of Parker Hannifin (Denison) HF-O and Cincinnati Milacron.

- Excellent thermal stability: Contains the latest thermally stable zinc type additives, virtually eliminating the formation of heat-related sludging in electro-hydraulic servos associated with conventional zinc-type oils.
- Excellent hydraulic stability in the presence of water: Will not contribute to the formation of corrosive reactants or metal-etching acids.

CAM2® PROMAX™ AW Hydraulic Oils

CAM2® PROMAX™ AW HYDRAULIC OILS contain quality additives that provide excellent anti-wear, rust and oxidation protection. CAM2® PROMAX™ AW Hydraulic Oils are recommended for use in many applications including but not limited to closed-loop hydraulic systems, farm, logging, and construction equipment. May also be used in circulating oil systems for gears and other moving parts protection.

- Excellent anti-foam and rust protection
- Good oxidative and thermal stability

CAM2® PROMAX™ R&O Hydraulic Oil

CAM2® PROMAX™ R & O HYDRAULIC OILS is a general purpose hydraulic oil formulation containing highly effective rust and oxidation inhibitors, plus a moderate anti-wear additive and foam dispersant package. CAM2® PROMAX™ R & O Hydraulic Oil is suitable for use in hydraulically actuated equipment, both old and new, where service requirements are normal to moderate and long-term, heavy-duty wear protection is not critical. CAM2® PROMAX™ R & O Hydraulic Oil has excellent low temperature properties for use in cold climates.

CAM2® Way Lube Oil

CAM2® WAY LUBE OILS are formulated for use in the slide ways of planers, grinders, horizontal boring machines, shapers, jigs, and milling machines. CAM2® Way Lube Oil incorporates state-of-the-art friction modifiers to decrease machine chatter associated with stick-slip phenomena of slow moving heavily loaded machine parts. They contain proven EP and anti-rust technology to promote the long life of machine tools. CAM2® Way Lube Oils are formulated to provide excellent fluid separation from water, and full and semi-synthetic metal working fluids. These fluids are fully approved for use in Cincinnati Milacron machining centers.

CAM2® Cherry Picker Oil

CAM2® CHERRY PICKER OIL surpasses the minimum dielectric strength specification of 25kV making it suitable for use in high voltage electric service vehicles. It’s a premium high dielectric strength, high VI (viscosity index) anti-wear hydraulic oil developed for dependable performance in mobile, marine, and industrial equipment, aerial platforms (man lifts) and bucket trucks, and emergency and electric service vehicles.

CAM2® Mining Hydraulic 68 Fluid

CAM2® MINING HYDRAULIC 68 FLUID is a quality anti-wear hydraulic oil providing excellent anti-wear, rust and oxidation protection. CAM2® Mining Hydraulic 68 Fluid may be recommended for applications where a quality, anti-wear hydraulic oil is required by equipment manufacturers. CAM2® Mining Hydraulic 68 Fluid provides excellent vane pump wear and protection. Extremely low pump part weight losses were encountered in the ASTM-D-2882 Vane Pump Wear Tests. CAM2® Mining Hydraulic 68 Fluid is available in square metal 35 pound tins approved for underground mining applications.

CAM2® R&O Hydraulic Oil

CAM2® R & O HYDRAULIC OILS is a general purpose hydraulic oil formulation containing highly effective rust and oxidation inhibitors, plus a moderate anti-wear additive and foam dispersant package. CAM2® PROMAX™ R & O Hydraulic Oil is suitable for use in hydraulically actuated equipment, both old and new, where service requirements are normal to moderate and long-term, heavy-duty wear protection is not critical. CAM2® PROMAX™ R & O Hydraulic Oil has excellent low temperature properties for use in cold climates.
